Eliminate ingrown hairs, bumps and razor burn with PFB Vanish!

Not all women and men can look clean shaven. Some individuals, especially with heavy, curly hairs, may develop ingrown hair. Shaving facilitates the process of ingrown hairs. Tender pimples then arise when closely cut hairs grow out and pierce the hair follicle or curl back and reenter the skin to cause a foreign body reaction. This condition is Pseudo Folliculitis Barbae (PFB) and this is where Vanish comes to the rescue!

- And most importantly... IT WORKS!
